THE PROJECT

How the phenomenon of depopulation in the EU is taking place?

Which are the historical and contemporary causes and main factors involved?

How to promote economic and social development in rural depopulated areas starting from best practices?

The project aims to explore possibilities of rural development to tackle unemployment and depopulation and to raise awareness on the key role of cultural heritage in defining the European identity

OBJECTIVES

BEST PRACTICES

We will share best practices between organizations in Europe dealing with depopulation and rural development.

Our aim is to develop guidelines for local and educational authorities to prevent the depopulation and its dynamics

TRAINING

We will train key figures as well as unemployed adults, workers and members of rural depopulated communities and the entrepreneurs thus stimulating techniques for rural development and building bridges between companies, institutions and local authorities

PROMOTING

Promote technical tools to develop entrepreneurship and encourage socio-economic actions aimed at the re-development of local contexts
