

Meeting with Banzi

The ROBOTS Project Team met Massimo Banzi on 19th of February 2018.

The ROBOTS project team together with other colleagues of ours from the IT Department of Aldini Valeriani met Massimo Banzi, co-designer of the Arduino board. The meeting took place at the Opificio Golinelli, where a meeting was held to present the new Kit CTC-101 (Creative Technologies in the Classroom). For us it was an opportunity to present the ROBOTS project to Banzi.
