

## An interview of LookUp Radio

During the project meeting held in Bologna on 16 April 2018, we had the pleasure of living the experience of a live interview at LookUp! Radio, the web radio of the Aldini Valeriani and media partner of our Project Robots. Sonsoles Jimenez and Giovanni Santandrea presented the basic ideas and activities planned by the project ROBOTS. Davide Grasso, the LookUp! Radio's referent, allowed us to live this beautiful experience.

LookUp! Radio is an educational workshop including school-work alternation. A permanent "simulation" of the relationships that characterize the working contexts in which the students can get involved with real skills in a work aimed at creating a true finished product. The philosophy of LookUp Radio is "learning by doing".
